

IRU INSTITUTE OF TECHNOLOGY

100 Professional IT Courses — Course Catalogue

Company Information

Iru Institute of Technology provides practical, career-focused IT training designed to help learners build strong technical foundations and job-ready skills. The institute offers courses across Java, Spring, Microservices, Cloud, DevOps, Databases, Frontend Development, AI, System Design, Testing, and Software Engineering.

Trainer: Shoaib Hasan

All courses are designed with a practical learning approach, combining concepts, examples, hands-on exercises, and industry-oriented development practices.

Java Programming — Regular Price: ■8,999 | Discount: 20%. A practical course covering Java fundamentals, object-oriented programming, collections, exceptions, streams, and modern Java development.

Advanced Java — Regular Price: ■11,999 | Discount: 25%. Learn advanced Java concepts including concurrency, JVM fundamentals, generics, functional programming, and performance techniques.

Java 17 and 21 — Regular Price: ■9,999 | Discount: 20%. Explore modern Java features such as records, sealed classes, pattern matching, virtual threads, and contemporary coding practices.

Spring Boot — Regular Price: ■10,999 | Discount: 25%. Build production-ready applications with Spring Boot, dependency injection, configuration, REST APIs, validation, and actuator.

Spring Framework — Regular Price: ■9,499 | Discount: 20%. Understand the core Spring ecosystem including IoC, dependency injection, beans, configuration, AOP, and application architecture.

Spring MVC — Regular Price: ■8,499 | Discount: 20%. Master web application development using Spring MVC, controllers, request mapping, validation, exception handling, and view concepts.

Spring Security — Regular Price: ■10,499 | Discount: 25%. Learn authentication, authorization, JWT, OAuth2 concepts, password security, filters, and secure REST API development.

Spring Data JPA — Regular Price: ■9,999 | Discount: 20%. Work with JPA and Hibernate to build database-driven applications using repositories, relationships, queries, pagination, and transactions.

Hibernate ORM — Regular Price: ■8,999 | Discount: 20%. Learn object-relational mapping, entity relationships, fetching strategies, caching, JPQL, criteria queries, and Hibernate best practices.

Microservices with Spring Boot — Regular Price: ■14,999 | Discount: 30%. Design and build scalable microservices using Spring Boot, REST, service discovery, configuration, resilience, and distributed patterns.

Spring Cloud — Regular Price: ■12,999 | Discount: 25%. Explore service discovery, centralized configuration, API gateways, load balancing, resilience, and cloud-native Spring architecture.

Spring Cloud Gateway — Regular Price: ■8,999 | Discount: 20%. Build API gateway solutions with routing, filters, authentication integration, rate limiting, and traffic management.

REST API Development — Regular Price: ■7,999 | Discount: 20%. Develop clean and secure RESTful APIs with HTTP methods, status codes, validation, exception handling, documentation, and testing.

GraphQL with Java — Regular Price: ■9,499 | Discount: 20%. Build GraphQL APIs with schemas, queries, mutations, resolvers, data fetching, and integration with Spring applications.

Apache Kafka — Regular Price: ■11,999 | Discount: 25%. Learn event-driven architecture with Kafka topics, partitions, offsets, consumer groups, producers, consumers, and reliable messaging.

Kafka Streams — Regular Price: ■9,999 | Discount: 20%. Process real-time event streams using Kafka Streams, state stores, joins, windows, transformations, and scalable stream processing.

RabbitMQ — Regular Price: ■8,499 | Discount: 20%. Master asynchronous messaging with exchanges, queues, routing keys, acknowledgements, retries, dead-letter queues, and consumers.

Redis — Regular Price: ■7,999 | Discount: 20%. Use Redis for caching, session management, counters, distributed locks, and high-performance data access in modern applications.

PostgreSQL — Regular Price: ■7,499 | Discount: 20%. Learn PostgreSQL database design, SQL, joins, indexing, transactions, views, optimization, and practical application integration.

Advanced SQL — Regular Price: ■6,999 | Discount: 15%. Strengthen SQL skills through complex joins, subqueries, window functions, CTEs, aggregation, optimization, and analytical queries.

Database Design — Regular Price: ■7,499 | Discount: 20%. Learn relational database modeling, normalization, relationships, keys, constraints, indexing, and scalable schema design.

MongoDB — Regular Price: ■8,499 | Discount: 20%. Build applications with MongoDB using documents, collections, queries, indexes, aggregation pipelines, and schema design techniques.

MySQL — Regular Price: ■6,999 | Discount: 15%. Learn MySQL from fundamentals through joins, transactions, indexes, stored routines, optimization, and application connectivity.

Docker — Regular Price: ■8,999 | Discount: 25%. Containerize applications using Docker images, containers, Dockerfiles, volumes, networks, registries, and production practices.

Docker Compose — Regular Price: ■6,999 | Discount: 20%. Orchestrate multi-container applications with Docker Compose, services, networks, volumes, environment variables, and dependencies.

Kubernetes — Regular Price: ■12,999 | Discount: 25%. Learn Kubernetes architecture, pods, deployments, services, config maps, secrets, probes, scaling, rolling updates, and troubleshooting.

Kubernetes Administration — Regular Price: ■14,999 | Discount: 30%. Develop practical cluster administration skills covering scheduling, networking, storage, security, scaling, upgrades, and diagnostics.

Helm — Regular Price: ■8,499 | Discount: 20%. Package and deploy Kubernetes applications with Helm charts, templates, values, releases, dependencies, and reusable configurations.

Google Kubernetes Engine — Regular Price: ■13,999 | Discount: 25%. Deploy and operate containerized workloads on GKE with cluster management, networking, scaling, security, and monitoring concepts.

AWS Fundamentals — Regular Price: ■9,999 | Discount: 20%. Understand core AWS services including EC2, S3, IAM, VPC, RDS, CloudWatch, and foundational cloud architecture.

AWS Solutions Architecture — Regular Price: ■14,999 | Discount: 25%. Design reliable and scalable AWS systems using compute, storage, networking, databases, security, and architecture best practices.

AWS DevOps — Regular Price: ■12,999 | Discount: 25%. Implement CI/CD, infrastructure automation, container deployment, monitoring, and release strategies using AWS services.

Google Cloud Fundamentals — Regular Price: ■9,499 | Discount: 20%. Learn essential Google Cloud services, IAM, compute, storage, networking, databases, and cloud application deployment.

GCP DevOps — Regular Price: ■12,999 | Discount: 25%. Build DevOps workflows on Google Cloud using CI/CD, containers, Kubernetes, artifact management, monitoring, and automation.

Git — Regular Price: ■5,999 | Discount: 15%. Master Git commands, branching, merging, rebasing, conflict resolution, tagging, history management, and professional workflows.

GitHub — Regular Price: ■5,999 | Discount: 20%. Learn GitHub repositories, pull requests, issues, actions, collaboration, code review, and practical team development workflows.

GitHub Actions — Regular Price: ■7,499 | Discount: 20%. Create CI/CD pipelines with GitHub Actions using workflows, jobs, secrets, environments, caching, testing, and deployment automation.

GitLab CI/CD — Regular Price: ■7,999 | Discount: 20%. Build automated pipelines with GitLab CI/CD, runners, stages, artifacts, variables, environments, and deployment workflows.

Jenkins — Regular Price: ■8,999 | Discount: 25%. Automate builds, tests, and deployments using Jenkins pipelines, agents, credentials, plugins, webhooks, and CI/CD best practices.

Maven — Regular Price: ■6,499 | Discount: 15%. Learn Maven project structure, lifecycle, dependencies, plugins, profiles, repositories, testing, and enterprise build management.

Gradle — Regular Price: ■6,999 | Discount: 20%. Build Java projects with Gradle using dependency management, tasks, plugins, multi-module builds, testing, and automation.

SonarQube — Regular Price: ■6,999 | Discount: 20%. Integrate static code analysis into development workflows and learn quality gates, vulnerabilities, code smells, coverage, and maintainability.

Java Unit Testing — Regular Price: ■7,499 | Discount: 20%. Write maintainable automated tests using JUnit, assertions, test lifecycle, parameterized tests, and practical testing strategies.

Mockito — Regular Price: ■6,999 | Discount: 20%. Learn mocking and unit testing with Mockito, including mocks, stubs, verification, argument matching, and service-layer testing.

Testcontainers — Regular Price: ■7,499 | Discount: 20%. Use Testcontainers to create realistic integration tests with disposable databases, messaging systems, and application dependencies.

REST API Testing — Regular Price: ■6,999 | Discount: 20%. Test REST services using practical API testing techniques including assertions, authentication, negative scenarios, and automation.

React.js — Regular Price: ■9,999 | Discount: 25%. Build modern user interfaces with React, components, props, state, hooks, routing, forms, API integration, and reusable patterns.

Advanced React — Regular Price: ■11,999 | Discount: 25%. Deepen React expertise with performance optimization, advanced hooks, context, state architecture, testing, and scalable component design.

React Hooks — Regular Price: ■6,999 | Discount: 20%. Master useState, useEffect, useContext, useReducer, useMemo, useCallback, custom hooks, and effective hook-based architecture.

JavaScript — Regular Price: ■7,999 | Discount: 20%. Learn modern JavaScript including ES6+, functions, objects, arrays, promises, async programming, modules, and browser fundamentals.

TypeScript — Regular Price: ■8,499 | Discount: 20%. Develop robust applications with TypeScript using types, interfaces, generics, utility types, narrowing, modules, and practical patterns.

HTML and CSS — Regular Price: ■5,999 | Discount: 15%. Learn semantic HTML, responsive CSS, layouts, Flexbox, Grid, accessibility, and modern frontend styling techniques.

Node.js — Regular Price: ■8,999 | Discount: 20%. Build backend services with Node.js covering modules, asynchronous programming, HTTP, APIs, middleware, and application architecture.

Express.js — Regular Price: ■7,499 | Discount: 20%. Develop REST APIs using Express.js with routing, middleware, validation, authentication, error handling, and database integration.

Full Stack Java Development — Regular Price: ■18,999 | Discount: 30%. A complete program combining Java, Spring Boot, REST APIs, databases, React, testing, security, Docker, and deployment practices.

Full Stack Development with React — Regular Price: ■17,999 | Discount: 30%. Build full-stack applications using React, JavaScript, REST APIs, backend services, databases, authentication, and deployment.

Backend Development with Java — Regular Price: ■15,999 | Discount: 25%. Develop strong backend engineering skills with Java, Spring Boot, REST APIs, databases, security, testing, and microservices.

Frontend Development with React — Regular Price: ■12,999 | Discount: 25%. Learn professional frontend development with React, JavaScript, TypeScript, responsive UI, APIs, testing, and modern architecture.

System Design Fundamentals — Regular Price: ■12,999 | Discount: 25%. Learn scalability, availability, caching, databases, load balancing, queues, APIs, partitioning, and practical system design approaches.

Advanced System Design — Regular Price: ■16,999 | Discount: 30%. Design distributed systems using advanced concepts such as sharding, replication, consistency, messaging, caching, resilience, and observability.

Low-Level Design with Java — Regular Price: ■12,999 | Discount: 25%. Practice object-oriented design, SOLID principles, UML concepts, design patterns, extensible code, and Java-based LLD problems.

High-Level Design — Regular Price: ■13,999 | Discount: 25%. Learn architecture-level decision making, service decomposition, data flow, scalability, reliability, and distributed system design.

Design Patterns in Java — Regular Price: ■8,499 | Discount: 20%. Master creational, structural, and behavioral design patterns with practical Java examples and real-world application scenarios.

SOLID Principles — Regular Price: ■6,499 | Discount: 15%. Understand and apply SOLID principles to create maintainable, flexible, testable, and extensible object-oriented Java applications.

Clean Code in Java — Regular Price: ■6,999 | Discount: 20%. Improve code quality through naming, methods, classes, refactoring, error handling, testing, and maintainable Java practices.

Object-Oriented Programming — Regular Price: ■6,499 | Discount: 15%. Build a strong foundation in encapsulation, inheritance, polymorphism, abstraction, composition, and practical object-oriented design.

Java Collections Framework — Regular Price: ■6,499 | Discount: 20%. Understand List, Set, Map, queues, hashing, iterators, comparators, and the internal behavior of common Java collections.

Java Concurrency — Regular Price: ■8,999 | Discount: 25%. Learn threads, executors, synchronization, locks, concurrent collections, CompletableFuture, race conditions, and modern concurrency.

Java Virtual Machine — Regular Price: ■8,499 | Discount: 20%. Understand JVM architecture, class loading, memory areas, garbage collection, JIT compilation, profiling, and performance fundamentals.

Java Streams API — Regular Price: ■6,999 | Discount: 20%. Master functional-style data processing with streams, lambdas, collectors, mapping, filtering, grouping, reduction, and parallel streams.

Java Functional Programming — Regular Price: ■6,999 | Discount: 20%. Learn lambdas, functional interfaces, method references, Optional, stream processing, and functional programming techniques in Java.

Java Multithreading — Regular Price: ■7,999 | Discount: 20%. Develop concurrent Java applications using threads, synchronization, executors, locks, thread pools, and safe shared-state techniques.

Virtual Threads — Regular Price: ■6,999 | Discount: 20%. Explore modern Java concurrency with virtual threads, structured task execution concepts, blocking workloads, and scalable server applications.

JWT Authentication — Regular Price: ■6,499 | Discount: 20%. Implement token-based authentication with JWT, access control, token validation, refresh strategies, and secure REST APIs.

OAuth2 and OpenID Connect — Regular Price: ■8,999 | Discount: 25%. Understand modern identity protocols and implement authorization and authentication flows for secure distributed applications.

API Security — Regular Price: ■7,999 | Discount: 20%. Learn practical API security covering authentication, authorization, validation, rate limiting, secure headers, and common attack prevention.

Microservices Security — Regular Price: ■9,999 | Discount: 25%. Secure distributed services using JWT, OAuth2, gateway security, service authentication, authorization, and secure communication patterns.

Resilience4j — Regular Price: ■7,999 | Discount: 20%. Implement circuit breakers, retries, rate limiting, bulkheads, time limiters, and fallback strategies for resilient microservices.

Distributed Systems — Regular Price: ■14,999 | Discount: 25%. Understand distributed communication, consistency, replication, partitioning, failure handling, consensus concepts, and scalable architecture.

API Gateway Architecture — Regular Price: ■7,999 | Discount: 20%. Design gateway layers for routing, authentication, rate limiting, observability, transformation, and service protection.

Service Discovery — Regular Price: ■6,999 | Discount: 20%. Learn service registration, discovery, health checks, client-side load balancing, and dynamic service communication in microservices.

Config Server — Regular Price: ■6,999 | Discount: 20%. Centralize configuration for distributed applications with environment-specific properties, secure secrets, refresh concepts, and deployment practices.

Observability — Regular Price: ■8,999 | Discount: 25%. Learn logs, metrics, traces, correlation IDs, dashboards, alerting, and practical observability strategies for distributed systems.

Prometheus and Grafana — Regular Price: ■8,999 | Discount: 20%. Monitor applications and infrastructure with Prometheus metrics, Grafana dashboards, alerting, queries, and visualization.

ELK Stack — Regular Price: ■9,999 | Discount: 25%. Centralize and analyze application logs using Elasticsearch, Logstash, and Kibana with practical logging and troubleshooting workflows.

OpenTelemetry — Regular Price: ■7,999 | Discount: 20%. Implement vendor-neutral tracing, metrics, and telemetry collection for modern distributed applications and microservices.

CI/CD for Java Applications — Regular Price: ■9,999 | Discount: 25%. Build complete Java delivery pipelines covering source control, builds, testing, containerization, deployment, and release automation.

DevOps for Java Developers — Regular Price: ■12,999 | Discount: 30%. Learn Docker, Kubernetes, CI/CD, cloud deployment, monitoring, configuration, and production practices from a Java developer perspective.

Cloud-Native Java — Regular Price: ■13,999 | Discount: 25%. Build cloud-ready Java applications using containers, microservices, configuration, observability, resilience, and Kubernetes.

Production-Ready Spring Boot — Regular Price: ■11,999 | Discount: 25%. Prepare Spring Boot services for production with validation, security, monitoring, logging, resilience, performance, and deployment practices.

Spring AI — Regular Price: ■12,999 | Discount: 25%. Build AI-enabled Java applications using Spring AI concepts, model integration, prompts, structured output, tools, and application workflows.

Generative AI for Java Developers — Regular Price: ■13,999 | Discount: 30%. Learn how Java developers can integrate generative AI into applications using APIs, prompts, tools, retrieval, and production patterns.

RAG with Spring AI — Regular Price: ■14,999 | Discount: 30%. Build retrieval-augmented generation applications using Spring AI, embeddings, vector databases, document retrieval, and grounded responses.

Vector Databases and pgvector — Regular Price: ■9,999 | Discount: 25%. Learn embeddings, similarity search, vector storage, indexing, and practical semantic search using PostgreSQL with pgvector.

AI Application Development — Regular Price: ■14,999 | Discount: 30%. Design practical AI-powered applications combining APIs, prompt engineering, retrieval, tool calling, security, and production architecture.

Prompt Engineering — Regular Price: ■7,499 | Discount: 20%. Learn structured prompting, role design, constraints, examples, evaluation, reasoning workflows, and reliable prompt patterns.

AI Agents — Regular Price: ■12,999 | Discount: 25%. Explore agentic application concepts including tool use, planning, memory, workflows, orchestration, and safe AI application design.

Machine Learning Fundamentals — Regular Price: ■9,999 | Discount: 20%. Understand supervised and unsupervised learning, data preparation, model evaluation, features, and core machine learning concepts.

Data Structures and Algorithms — Regular Price: ■9,999 | Discount: 25%. Strengthen problem-solving with arrays, strings, linked lists, stacks, queues, trees, graphs, hashing, sorting, and searching.

DSA in Java — Regular Price: ■10,999 | Discount: 25%. Practice data structures and algorithms using Java with complexity analysis, problem-solving patterns, recursion, trees, graphs, and dynamic programming.
